One of the craftsmen said that the troop strength of the advance unit at the installation, whose personnel were red-bordered black epaulets, was brought up to about 500 troops on 25 may. He further said that, among the officers, there were some wearing red-bordered green epaulets, black velvet collars and guards braids on their sleeves. No details could be gathered on the whereabouts of the troops previously quartered in the installation. Source only knew that a construction office previously housed there had noved to No 5 Angelika Strasse in the Waldschloesschen Quarter. Sedan for the first time at the barracks installation. Double seniries inside and outside the gate were red-bordered black epaulets. **		
25X1A <sup>‡</sup>	Comment. Both the 100th Grenadier legt maserne and the 101st Grenadier Regt Maserne are situated side by side on the north side of Murt Fischer Allee, formerly Nord Allee, and constitute a collective billeting area with extends from Marien Allee to the northwest as far as Madeberger Strasse to the southeast. The 100th Grenadier Regt Maserne is the installation to the northwest and is located at the intersection of Marien Allee and Furt Fischer Allee. Previous reports stated that is was largely destroyed. A motor pool or parking Lot of the Hc First Cds Mecz Army which is housed in the 101st Grenadier Regt Maserne, adjoining to the southeast, was believed to be located there.  Of the fact that MGB troops in the Soviet Zone of Germany generally changed from red-bordered green epaulets to red-bordered black epaulets at the beginning of April, it is notable that, according to the present report, there were still officers wearing green epaulets.
